DETAILED ACTION

Allowable Subject Matter

1. Claims 1-10, and 44-63 are allowed.

The following is an examiner's statement of reasons for allowance:

Re claims 1 and 58, the independent claim includes " the effective resonant frequency of the resonator depends upon the dielectric constant of the dielectric material and also depends upon the dielectric constant of the layer comprising the absorptive nanostructures/nanowires " in combination with the remaining claim limitation is not taught and/or made obvious by the prior art. **See remarks pgs. 5-8, received 7/6/05.**

Re claim 44, the independent claim includes " the effective resonant frequency of the resonator depends upon the dielectric constant of the dielectric material and also depends upon the dielectric constant of the layer comprising the degassed carbon nanotubes " in combination with the remaining claim limitation is not taught and/or made obvious by the prior art. **See remarks pgs. 5-8, received 7/6/05.**

Re claim 52, the independent claim includes " the effective resonant frequency of the resonator depends upon the dielectric constant of the dielectric material and also depends upon the dielectric constant of the layer comprising the activated carbon nonofibers " in combination with the remaining claim limitation is not taught and/or made obvious by the prior art. **See remarks pgs. 5-8, received 7/6/05.**

2. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue
